## SINGLE & TWIN .50 CALIBER GUN ENVELOP COVER INSTALLATION INSTRUCTIONS:

- 1) Remove the cover from its storage bag. Tuck the storage bag in the pouch inside the gun cover.
- 2) Install the cover over the barrel and cover entire gun mount.
- 3) Cinch cover tightly closed at the bottom. Do not leave open at the bottom as was the practice with traditional covers.
- 4) Leave the cover on the guns as much as possible. When not in use, store the cover in its storage bag in an internal area. If the inside of the cover gets wet, the moisture is still being wicked away from the gun and the Vapor Corrosion Inhibitors are working, so the best place to dry the cover is to leave it on the gun. This may seem counterintuitive, but if you understand how the cover works, it makes sense.
- 5) If you have any questions, please call or e-mail us (contact info listed above).
